

## DATA SECURITY

# Data Security & Disaster Recovery

Protecting your business, and your reputation

At CoreLogic Credco, data security and disaster recovery is consistently one of our highest priorities. It's why 19 out of the nation's top 20 lenders choose – and trust – Credco when it comes to safeguarding the integrity of consumer data.

### WHY TRUST YOUR BUSINESS WITH CORELOGIC CREDCO?

#### The Risk is Real

It only takes one headline to ruin your reputation, and potentially cost you millions. Identity theft and security breaches hurt everyone: your business, our company and, more importantly, your customers. Focusing on data security and disaster recovery to protect consumer information isn't just good business, it's our obligation to you and the consumers you serve.

#### Proven Systems Uptime

Credco maintains the industry's only on-site and off-site hot backup and disaster recovery systems and capabilities. That means we have a proven systems uptime that ensures a seamless and uninterrupted transfer of the credit information you need, when you need it. And should your LOS system fail or become unavailable, you can always access credit information and other Credco products directly from our Web-based portal – 24/7.

#### FCRA-Certified Customer Care

We've built our reputation on consistently delivering extraordinary customer care and technical support. Our team of FCRA-certified customer care specialists is dedicated to ensuring that our product offerings are optimized to your best business advantage. Combined with our world-class technical support, you can rely on trained, knowledgeable professionals to answer your questions and keep you connected for consistent and dependable data exchange.

For more information on Data Security & Disaster Recovery, contact a CoreLogic Credco sales associate at (800) 255-0792 or visit us online at [www.credco.com](http://www.credco.com).
